Internship Notice

Dear Students,

We are pleased to inform you that, Bolt IoT Student Partner Internship Program for the students of our college.

About the offsite internship program:

Bolt Student Partner Program is a 2-month offsite internship program (work from home/college) for the students of engineering and technical education.

Selected intern's day-to-day responsibilities:

1. Promote the Internet of Things and Machine Learning online training with the students.
2. Share information about Bolt such as project videos, promo videos, etc. over various social media channels such as WhatsApp groups, Facebook groups, etc.
3. Organise at least one Bolt IoT Webinar in the institute or organise a Bolt IoT meet-up or do both during the period of the Internship.

Who can apply?

Only those candidates can apply who:

- are available for the work from home job/internship.
- can start the internship from Monday, 19th August'19. Relaxation in the starting date in case the students have their exams.
- are available for a duration of 2 months. A break will be given during the exams.
- have relevant skills and interests.

Stipend structure:

- This is a performance-based internship. Students will be offered a stipend of Rs.500/- on every paid registration for the IoT & ML Training.
- There is no upper limit on the amount that the students can get. We expect that with a proper effort, students will be able to achieve a stipend of Rs.10,000/- a month.

Additional Perks:

- A certificate on the successful completion of the internship. To complete the internship, ensure that all the three above tasks are completed.
- A certificate of excellence for the top three performers.
- Letter of recommendation, flexible work hours.
- The intern will report directly to the CEO of Bolt IoT. Regular training via phone calls and webinar to sharpen your sales, marketing, and communication skills.
- Opportunity for a full-time job offer (PPO).

About the company:

BOLT an Internet of Things of a startup based out of Bengaluru with our flagship product being Bolt IoT Platform. Bolt is a fully integrated IoT platform for developers that helps them build IoT projects and products quickly and easily. Bolt has users across 62 different countries with more than 25,000 units of the hardware module shipped.

In India, our enterprise clients of Bolt include Marico, HDFC Bank, Minda Group, Molbio etc. We were one of the startups that were invited to accompany Prime Minister Narendra Modi during his visit to the USA in 2015 as part of the Indo-US Startup Konnect Program. We have won various awards such as DST-Lockheed Martin India Innovation Growth Program 2015, Economic Times Power of Ideas 2016 etc for innovation and patented technologies. In 2016 we raised our first round funding of INR 3 Crore.
